Cc: Tim Savas <timothy.savas@gmail.com>

Hi Ailene,

There's a website I found that I filled in from here:

<https://osc.hul.harvard.edu/authors/waiver/> and received the below waiver. Can you please file a copy of this on the repo? I also uploaded the most recent main text and supp.

Tim, I think you still have to do this for MIT. See here:

<https://libraries.mit.edu/scholarly/mit-open-access/> and look for 'Opt-out of MIT's OA policies.'

All the best,

Lizzie

Subject: Open Access Policy Waiver

Date: Fri, 31 Jul 2020 18:12:46 -0400 (EDT)

From: dash-noreply@hulmail.harvard.edu

To: wolkovich@fas.harvard.edu

Dear Elizabeth Wolkovich,

Pursuant to the Open Access Policy adopted by Faculty of Arts & Sciences of Harvard University on February 12, 2008, this communication serves to notify you that your request for a waiver of the Open Access license for "Winter temperatures predominate in spring phenological responses to warming" in Nature Climate Change has been granted. This waiver may not be revoked by Harvard, and Harvard will have no license under the policy unless you choose to relinquish the waiver.

Independent of the waiver, we recommend that you deposit your article in the DASH repository as specified in the Faculty of Arts & Sciences Open Access Policy. You can do so regardless of the waiver status of the article or any agreement that you may have signed with a publisher. The simplest method for depositing your article is to email the accepted author manuscript (the language approved by peer review) to

osc@harvard.edu or to contact your school's open access liaison.

In cases where you receive a waiver of the Faculty of Arts & Sciences policy, the publisher's agreement may provide sufficient rights to allow copies of your article to be made publicly available in the Harvard repository. The publisher may ask that certain conditions be met, some of which the repository can easily accommodate (for example, an embargo period during which the article will not be made publicly available).

Even if you conclude that your article cannot be made publicly available, depositing a copy of your article in the repository is useful for archival and indexing purposes. The bibliographic information will be made available for harvesting and indexing by search engines, such as Google Scholar, creating increased awareness of your article.

If you have any questions about the waiver of this policy, the Faculty of Arts & Sciences Policy for Open Access, or depositing in the Harvard repository, please visit the Office for Scholarly Communication website at <https://osc.hul.harvard.edu/>, write to osc@harvard.edu, or contact your school's open access liaison.

Important note for NIH-funded authors: Even though you are being granted a waiver of the application of the Faculty of Arts & Sciences policy to your article specified above, if that article is subject to the NIH Public Access Policy because it is a peer-reviewed manuscript that arose, in whole or in part, from NIH-funded research and was accepted for publication on or after April 7, 2008, your obligations under the NIH policy cannot be waived. You must be sure to reserve rights sufficient to comply with the NIH policy when you enter into a publication agreement for the article. For this purpose, you can use an addendum that Harvard has developed to deal specifically with the NIH Public Access Policy. To create a copy of that addendum, or for more information on the NIH requirements, please visit <https://www.countway.harvard.edu/publicaccess>.

Sincerely,

The Office for Scholarly Communication
