INTERACTIVE CUES

figure thoughts, ruminations, etc.

Also need to show "current climate" (to set up paper)

b Distribution maps... w/ 1980-2100 2040-2060; 2070-2100

Change in min pre-leafout temp (max? or mean?)

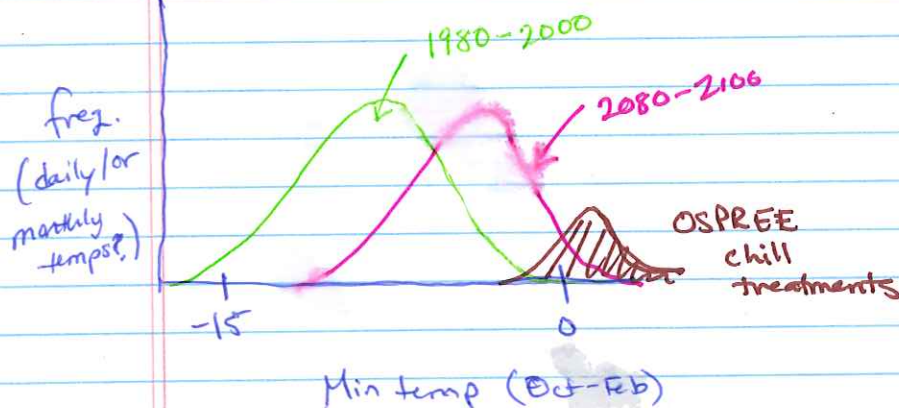

Change in average dormancy marks' min + max temps?

2 each?

2050-current

2100-current

c *

How can we best compare to OSPREE?

Limit to OSPREE data from range?

And integrate over range for histograms?

* Need to pick: a or c, not both
